iSight 20/20 Code Reader and Code Reader+

Capable and affordable code reader inspection systems for use on all printed surfaces

The iSight 20/20 Code Reader inspection system typically utilizes 1 to 2 cameras to reliably verify 1D, 2D, ink jet, laser, and thermal transfer printed codes on any and all surfaces. Our Smart AI+ technology allows you to complete inspections never before possible with standard rules-based vision tools. Smart AI+ tools are robust enough to reliably read codes distorted by varying line speeds, curved surfaces, uneven surfaces and packaging textures.

- Installed by **certified factory personnel**.
- Reliable and validated iSight vision suite ensures **no user programming required**.
- kmV support is the best in the marketplace. Every 20/20 system includes remote support and secure, cloud-based backup to maximize your uptime.
- 24/7 Service Packages available.
- kmV has been engineering **vision inspection solutions since 2003**.
