Case Pack Verification

iSight 20/20 Case, Carton & Kit Pack Verification

Capable and affordable one to two camera inspection systems with integrated process controls

The iSight 20/20 Case, Carton and Kit Pack inspection system utilizes 1 to 2 cameras to identify and reject improperly filled cases. Errors detected include missing or too many products, improperly oriented products and products with the wrong color cap An additional inspection can be added to verify the product is being placed in the proper case. Integrated process controls can be used to start or stop upstream and downstream equipment.

- Installed by **certified factory personnel.**
- Reliable and validated iSight vision suite ensures **no user programming required**.
- kmV support is the best in the marketplace. Every 20/20 system includes remote support and secure, cloud-based backup to maximize your uptime.
- 24/7 **service packages** available
- kmV has been engineering **turnkey vision inspection solutions since 2003**.
